IL NETTARE DELLA MATEMATICA

The Math of Bees or the Bees in Math?

If you are a Biologist, a Mathematician or simply curious, this is the workshop for you! Entomologists and Bio-Mathematicians will discuss about how to join forces against the enemies of the bees. Follow us. Be(e) informed!

PROGRAM

14.30 WELCOME

14.45 PROF. NICHOLAS FERRIS BRITTON

“The effect of multiple stressors on honey bee populations”

15.30 DR. GIANLUIGI BIGIO

“Hygienic behaviour in honey bees”

16.00 HONEY BREAK

16.30 PROF. FRANCESCO PENNACCHIO

“Immunity, stress and honey bee health”

17.15 DR. ALESSANDRO CINI “The invasion of the yellow legged hornet, *Vespa velutina*, in Europe twelve years after its discovery: where should we focus next research efforts?”

17.45 PROF. EZIO VENTURINO “Epidemiological models of viral infections in *Varroa destructor* mite-infested *Apis Mellifera* beehives”

18.15 CONCLUSIONS

ORGANIZERS Luca Pietro Casacci, Sara Bernardi, Emma Perracchione, Hanli Qiao, Luca Rubini, Ilaria Stura.

Participation is free and open to everyone, as long as there will be place. Registration is required. Some sessions will be held in English.
