A guide to discover UniTo
At the heart of Europe
With about 74,000* students and about 3,700** academic and administrative staff, the University of Torino (UniTo) in north-west Italy is one of the country’s largest and most prestigious universities. The university, founded in 1404, provides quality higher education and research opportunities; many UniTo graduates have achieved international renown.

Today, the University of Torino offers over 150 undergraduate and graduate degree programs in almost every field of study. A growing number of programs are taught in English, and Italian language tuition is available for incoming students.

The university’s 27 departments offer excellent opportunities for Italian and non-Italian academic staff; doctoral school provides more than 30 doctoral programs.

International and local funding programs, both public and private, support the university’s commitment to innovation and research. UniTo is extremely aware of its role in the local community, promotes knowledge transfer to industry through patent licensing and spin-offs, and engages publicly with science, respecting economic, social and environmental sustainability.

* In a.y. 2017-2018
** At 31st December 2017

About 4,400 international students and more than 600 agreements with other universities all over the world enhance UniTo’s international dimension.

Students and academic staff can make use of 22 libraries with about 2 million books and full access to the web, the Botanical Garden and a number of university museums; university accommodation, university canteens, and well-situated sports facilities.

Torino is a lively, people-oriented city and boasts a wide variety of cultural resources: historic buildings, world-class museums and galleries, as well as numerous exhibitions and fairs. The city’s parks and 2 rivers together with the nearby mountains and lakes provide a great leisure environment.

</table>
10 reasons for choosing UniTo

1 Reliability
A reliable partner for research programs and international teaching

2 Tradition
One of Italy’s oldest, largest, and most prestigious universities with its 600 years of existence

3 Innovation
A modern approach, renovated infrastructure, innovative courses and research programs

4 Teaching
A great range of undergraduate, graduate degree programs and Italian language tuition for international students and guests

5 Research
High quality PhD courses, funded projects, fellowships in a wide range of subject areas

6 Internationalisation
Cooperation agreements with higher education and research institutions worldwide, double degree programs, degree programs taught in English

7 Facilities
Libraries, archives, museums, university canteens, sport facilities

8 Accommodation
University halls of residence and private accommodation for students and for academic staff

9 Fees
Generous state subsidies on tuition fees, reductions, scholarships and free accommodation available according to students’ family income

10 Responsibility
Clear awareness on the University’s part of its social responsibilities and of the importance of economic, social, and environmental sustainability

Research, teaching and third mission

3rd among the largest Italian Universities for research*

23 (out of 27) top ranking Departments for scientific research in Italy*

Over 40,500 scientific publications from 2013 to 2017

Over 600 research projects managed per year

The only Italian University in the EU Knowledge and Innovation Community EIT Food

About 74,000 students in a.y. 2017-2018

Over 12,000 graduates per year

About 4,400 international students in a.y. 2017-2018

1st University in Italy for public engagement*

*Italian Quality Assessment of Research (VQR) 2011-2014
UniTo and the international dimension

Cooperation agreements
UniTo cooperates with international universities and institutions to develop joint research and education activities and foster professor and student exchange programs. UniTo is involved in over 600 formal agreements with universities in about 100 countries all over the world and in several international networks.

International mobility for students
UniTo promotes several initiatives to foster student mobility through specific programs: Erasmus+ mobility for exchange students and traineeship with EU and partner countries (over 1,000 agreements), student exchange with partner universities worldwide, over 20 double/joint degree programs in Europe and outside Europe. PhD students at UniTo can develop their doctoral thesis in joint-supervision with international partners from all over the world.

International teaching
Fostering the internationalisation of teaching is a strategic target for the University of Torino, currently offering 15 undergraduate and graduate degree programs taught in English and over 700 single courses in English and in other European languages, involving visiting professors from all over the world.

Development cooperation
UniTo promotes exchange programs, research activities and courses on sustainable development in partnership with Italian and foreign universities to support developing countries in strengthening sustainability, human rights and peace. As best practice, “Progetto Uni.Coo” involves students in development cooperation projects in Africa, Asia and Latin America.

Université Franco-Italienne
UniTo hosts the secretary of the Université Franco-Italienne, a bi-national institution funded by the Italian and French Ministries of Education for the promotion of academic and scientific cooperation between Italy and France.

Confucius Institute
Established in 2008 by UniTo in cooperation with the East China Normal University of Shanghai, the Confucius Institute offers Chinese language courses and promotes cultural events to boost educational, scientific and cultural ties with China.

Sustainability

Our commitment to social responsibility

The University of Torino is proud of its sustainability efforts and is seriously committed to contributing to the sustainable development of society. A positive social and environmental impact is an organisational challenge to be faced internally and externally, through partnerships with stakeholders on both local and global levels.

In the last few years, UniTo has committed itself to sustainability and has edited annual sustainability reports in accordance with international standards. UniTo has gained a role in international and national associations for universities and sustainability. Among the initiatives, the hosting of the UNESCO Chair for Sustainable Development is an honour and a privilege for UniTo.

The commitment towards sustainability is reflected in our teaching activities, research projects aimed at creating long-term positive outcomes, as well as, in third mission through knowledge transfer.

Economic sustainability

Employing around 3,700 human resources and with an economic value of 460 million euros, UniTo is closely connected to the local community. A broad range of partnerships with local and international organisations reinforces UniTo’s dimensions, both international and civic. Ethical and sustainable procurement is a key issue for UniTo.

Social sustainability

UniTo is committed to improving the employment opportunities for students by offering study programs meeting the needs of labour markets and by providing tutoring and placement services. As a result, UniTo is one of the top universities in terms of students’ employability rate (according to national assessments). At UniTo, gender equality is reflected in all the careers stage at all levels. To guarantee fair and equal access to higher education studies, UniTo has adopted a policy of full inclusion for disabled students, and students in financial need are provided with economic support and/or reduced admission fees. International students benefit from dedicated services – Italian language tuition, assistance in finding accommodation, reduced tuition fees according to family income and scholarships – to help them settle into their new life at the university and in the city.

Environmental sustainability

The UniTo Green Office is the hub that coordinates, plans and promotes all the initiatives dedicated to environmental sustainability at UniTo. Designed with a multi-stakeholder governance model, the UniTo Green Office works on several strategic assets such as: Food, Mobility, Waste, Green Public Procurement and Energy. Those interested in environmental responsibility are welcome to join the UniTo Green Office and its groups. For more information: www.green.unito.it

Sport at the University

CUS Torino

The University Sports Centre (CUS Torino) aims at promoting competitive and non-competitive sports among students, teachers and employees at the University of Torino. It offers more than 100 different sports at all levels. CUS Torino sports facilities are located in a number of sites in the city and in surroundings areas. The CUS CARD is free for Torino University students, Erasmus students, teachers and employees. In addition, thanks to CUS Progetto Disabili, students with disabilities can enjoy all activities, using specially adapted equipment, under the presence of a qualified instructor.

Torino’s great location, close to mountains, countryside, rivers and lakes, provides an excellent environment for a wide range of sports and outdoor activities. Ski slopes and mountain walking trails are only an hour’s drive away. Rowing, rafting and kayaking are very accessible: many of the city’s rowing clubs, on the banks of the Po River, were founded over a century ago.

SUISM - University Sport Service Centre

The SUISM Centre promotes the application of scientific research to sport, its services are intended for students and staff who wish to pursue careers in the field of sport. The centre manages the sports facilities associated with all sport-related courses in various departments.

1 Arts and humanities
Department of Foreign Languages and Modern Cultures

The Department’s teaching and research relate to Western and Eastern modern languages, with their literatures and cultures. Language-related basic, applied, and pedagogic research is carried out, and focus is given to forms of cultural expression in the countries studied. Courses provide students with the skills required for today’s labour market.

Main Research Areas
- Foreign languages
- European cultures
- International literatures

www.dipartimentolingue.unito.it

Department of Historical Studies

The Department takes a diachronic approach, from antiquity up to the present. Teaching and research explore a wide range of areas of historical studies, from archaeology to the history of religions, with a global reach covering the ancient Middle East, the Mediterranean area, the origins of Europe, the Americas, Asia and Africa.

Main Research Areas
- Archaeology
- Geography
- Ancient history
- History of art
- Contemporary history
- Medieval history
- Modern history
- History of religions
- Cultural heritage

www.dipstudistorici.unito.it

Centre for Special Training in Conservation, Restoration and Valorisation of Cultural Heritage
- A joint project of the Departments of Historical Studies, Chemistry, Physics, Geophysical Sciences, Life Sciences & Systems Biology, and the School of Natural Science, with “La Venaria Reale” Foundation Centre for the Conservation and Restoration of Cultural Heritage.
Department of Philosophy and Education

With academic staff from a range of fields including philosophy, education, communication studies and sociology, the Department offers a modern, interdisciplinary approach in teaching and research. Key areas in philosophy and education are studied with reference to their historical development and their influence on contemporary cultural discourse.

www.dfe.unito.it

Main Research Areas
- Theoretical philosophy
- History of philosophy
- Education
- Media studies

Department of Humanities

The Department combines the Italian humanistic tradition in philology, literature, art and culture with an interdisciplinary approach, that includes modern teaching and research areas, such as Asian, African and Mediterranean studies, and media, music and performing arts. Teaching and research in Italian studies are carried out within the Department.

www.studium.unito.it

Main Research Areas
- Asian, African and Mediterranean studies
- Comparative studies in literature, art and culture
- Philology
- Italian studies
- Linguistics
- Media, music and performing arts
Economic, juridical and social sciences
dcps

Department of Cultures, Politics and Society

The Department’s research and teaching focus on ways in which people build societies, organise and regulate social life, plan political institutions, and communicate with each other and by media and the web. A critical, interdisciplinary approach in the study of social relations, social structures, social identities and social phenomena is central to the Department’s research programs.

— www.dcps.unito.it

esomas

Department of Economics, Social Studies, Applied Mathematics and Statistics

The Department adopts an interdisciplinary approach in analysing social and economic processes, with a focus on political economics, social sciences, statistics and mathematics. Programs relate to the areas of business management, financial and insurance institutions, public administration, the not-for-profit sector, and international organisations.

— www.esomas.unito.it

dest

Department of Economics and Statistics

A longstanding tradition in teaching economics and related areas is today combined with interdisciplinary studies involving sociology, politics, and law, and with an applied approach to contemporary topical issues. The Department’s research projects focus on the economic and statistical aspects of social sciences, and explore new areas of study, such as complexity economics and happiness economics.

— www.est.unito.it

Main Research Areas
- Sociology and social research
- Political theory and philosophy
- International relations
- Social and cultural anthropology
- Economic geography
- Economic sociology

Main Research Areas
- Economics of innovation and science
- Environmental economics
- Labour, family and gender economics
- Public finance
- History of the economic thought and economic methodology
- Social statistics and demography

Main Research Areas
- Agent-based simulation for social science
- Empirical analysis of taxation
- Applied health economics
- Applied microeconomics
- Bayesian non-parametric methods
- The corporate finance of business groups
- Savings, heterogeneity and housing decisions
- Language and financial decisions
- Gender behavioural economics
- Health and human capital in the elderly
The Department analyses the transformation and governance of regions in terms of their physical, economic, social, political, and cultural features, with a view to sustainability. The Department promotes, coordinates, and manages research, teaching, technological transfer, and services in the areas of science, of urban and regional policy, and of regional, urban, landscaping, and environmental planning.

— www.dist.unito.it

**Main Research Areas**
- Sustainability, habitability and governance of post-metropolitan regions
- Pervasive sensing and smart devices
- Zero-energy buildings in smart cities
- Sustainable mobility information network for alpine areas
- Territorial approaches to new governance
- Adaptation to climate change, catastrophe prevention, agricultural development for food security
- Institutional capacity for regional development

---

**Department of Law**

Founded in 1404, with the University, the Department has produced many renowned jurists, scholars, statewomen, and statesmen. The Department, although strongly grounded in tradition and experience, today takes a modern approach to private law, EU law, comparative law, and related fields; it participates in numerous international exchange programs with leading universities worldwide.

— www.dg.unito.it

**Main Research Areas**
- Comparative law
- Criminal law
- Civil law
- International law
- Intellectual property law
- Information technology law

---

**Department of Management**

The Department's research focuses on corporate and institutional behaviour in economic decision-making and in business management. Key areas of departmental teaching and research are factor and output markets, strategies that companies adopt to meet their goals, collection of accounting information, and the structure of financial systems.

— www.management.unito.it

**Main Research Areas**
- Corruption and remedies
- Transparency and integrity in public authorities
- Business ethic
- Company taxation in EU and European competitiveness
- New European accounting strategy for corporations and SMEs
- Environmental management
The Department’s activity focuses on two main areas: applied laboratory research and specialist support provided to local services and their organizations. Special focus is devoted to clinical training of psychologists and research includes both traditional and new areas such as neuropsychology, neuro-imaging, wellbeing and work-family interface.

— www.dippsicologia.unito.it
3 Life sciences and medicine
dscb

Department of Clinical and Biological Sciences

Located in modern premises within the San Luigi Gonzaga Hospital, the Department carries out basic and top ranked clinical research in areas ranging from cell biology to molecular biology. Further key research areas focus on the central nervous system, oxidative mechanisms, physiology and clinical pharmacology, regenerative medicine, nanotechnologies and genetic disease.

— www.dscb.unito.it

Main Research Areas
- Molecular and cellular biology
- Stem cells and regenerative medicine
- Metabolic diseases, rare diseases
- Neuroscience
- Health, society, clinical epidemiology and biostatistics
- Genomics and bioinformatics

---

dsm

Department of Medical Sciences

The Department brings together multidisciplinary groups working on clinical, preclinical and basic research, in areas such as diagnosis, pathogenesis, physiopathology, genetics and therapy for systemic and organ-specific diseases. Research groups are committed to creating common funding projects and sharing technologies with industry.

— www.dsm.unito.it

Main Research Areas
- Translational and clinical research: pathophysiological mechanisms of common and rare diseases, diagnosis and treatment
- Epidemiology and risk factors
- Transplants and regenerative medicine
- Innovative diagnosis and molecular imaging

---

dbios

Department of Life Sciences and Systems Biology

The Department carries out teaching and research in biology, environmental science and biotechnology, with special focus on areas such as biodiversity, ecology, evolution, conservation and microbiology. It coordinates its various research groups and manages research facilities such as the Botanical Garden and the Herbarium.

— www.dbios.unito.it

Main Research Areas
- Life and health
- Biochemistry and biotechnology
- Biology and evolution

---
dbmss
Department of Molecular Biotechnologies and Health Sciences

Departmental research focuses on molecular events underlying pathophysiological processes, and takes a translational medicine approach. Combining basic research and clinical research to develop translational paradigms, the Department seeks to develop advanced diagnostic technologies and innovative therapeutic strategies for clinical practice.

— www.dbmss.unito.it

Main Research Areas
- Molecular and cellular mechanism of metabolic diseases, cardiovascular, oncologic and degenerative diseases
- Stem cells and regenerative medicine
- Computational genomics
- New diagnostic imaging technologies and advanced chemical methodologies
- Pre-clinical and clinical testing of new therapeutic protocols
dns
Department of Neurosciences

Research groups within the Department carry out research work in a wide range of areas, in particular neuronal plasticity, regeneration, endocrinology, and neuro-degeneration. The Department also provides healthcare science services in 3 clinics and in prestigious units in Città della Salute e della Scienza, Europe’s largest medical centre.

— www.neuroscience.unito.it

Main Research Areas
- Micro- meso- and macro-connectomics
- Neurodegenerative diseases
- Psychiatric disorders
- Neurobiology of sexual dimorphism
- The placebo effect
donc
Department of Oncology

The Department, located in the San Luigi Gonzaga Hospital, focuses on preclinical, translational and clinical research in cancerous pathology. As a medical department, it promotes the knowledge transfer both to courses and to hospital services.

— www.oncology.unito.it

Main Research Areas
- Thoracic cancers
- Gastrointestinal cancer
- Tumour microenvironment
- Biomarkers
- Oncogenomics
- Targeted therapies
**Department of Public Health and Pediatrics**

17 research groups and over 10 laboratories carry out research and teaching within the Department, in a wide range of areas, including hygienics and microbiology, medical statistics, child and adolescent psychiatry, and forensic pathology. The Department, located in the Città della Salute e della Scienza medical centre, also provides healthcare services.

— www.dsspp.unito.it

**Main Research Areas**
- Physical anthropology
- Bacteriology and mycology
- Cytimmunodiagnostic
- Pediatric haematology
- Clinical epidemiology
- Medical epidemiology and statistics
- Environmental hygiene
- Immunology
- Viral infections
- Health promotion
- Criminology
- Serology and microbiology
- Cadaver studies
- Virology

**Department of Surgical Sciences**

The Department promotes innovative research projects, adopting a multidisciplinary approach that includes general and specialist surgery, anaesthesia, radiology, and dentistry. As a medical department located in Città della Salute e della Scienza medical centre, it provides training in a wide range of clinical and healthcare areas. In addition, the Department is a key adviser for local public health institutions.

— www.dsc.unito.it

**Main Research Areas**
- New technologies in surgery
- Maternal fetal medicine
- Organ transplantation
- Interventional radiology
- Respiratory diseases
- Disability and rehabilitation

**Department of Veterinary Sciences**

The Department is committed to excellence in teaching and research in various areas of veterinary science, with a special focus on the welfare and health of animals, humans and the environment. The Department is located on the outskirts of Torino, and has a teaching and experimental farm and a dog pound.

— www.veterinaria.unito.it

**Main Research Areas**
- Veterinary anatomy and physiology
- Animal disease, pathology and epidemiology
- Food safety
- Veterinary medicine, surgery and reproduction
- Animal genetics and nutrition
- Pharmacology and toxicology

**Main Research Areas**
- Veterinary anatomy and physiology
- Animal disease, pathology and epidemiology
- Food safety
- Veterinary medicine, surgery and reproduction
- Animal genetics and nutrition
- Pharmacology and toxicology
The Department carries out research and teaching in the areas of plant and animal-based primary production and transformation processes, and in the interaction of such activities with the environment. Research in agricultural, forest and food sciences is focused on the needs of fast-changing societies, and benefits from a multidisciplinary approach.

— www.disafa.unito.it

Teaching and research within the Department cover all aspects of drug discovery, from drug design, synthesis and characterisation to formulation and clinical pharmacology, using a multidisciplinary approach. The Department works with a network of national and international partners, including universities, research centres and companies.

— www.dstf.unito.it
Natural sciences and technology
Department of Chemistry

The Department’s multi-disciplinary research activities, ranging from analytical and environmental chemistry to industrial chemistry and metallurgy, focus on the underlying foundations of chemical science related phenomena. The Department promotes cooperation and joint research projects with partners both within and outside the University.

- www.chimica.unito.it

Main Research Areas
- Analytical and environmental chemistry
- Physical chemistry
- Inorganic chemistry
- Organic chemistry
- Materials and industrial chemistry

Department of Earth Sciences

Teaching provided within the Department combines traditional and cutting-edge techniques in geology. Research activity covers a range of disciplines, such as chemistry, physics, natural science, genetic inheritance and biomedical science, and aims to foster interaction with civil society as well as public and private stakeholders in geology-related activities.

- www.dst.unito.it

Main Research Areas
- Paleontology, sedimentology, structural geology
- Mineralogy, petrology and geochemistry
- Geomorphology and applied geology
- Geophysics
- Geosites and cultural heritage

Department of Computer Science

The Department is the University’s centre for coordination of research on IT, in areas such as human–computer interaction, big data analysis, and virtual reality. A number of research projects benefit from partnerships with national and international research centres and companies.

- www.di.unito.it

Main Research Areas
- Artificial intelligence and human–computer interaction
- Formal methods in computing
- Performance evaluation and system validation
- Complex socio-technical networks and distributed systems
- Complex systems, big data analysis and systems biology
- Image processing and virtual reality
Department of Mathematics

The Department promotes research and teaching in all mathematics-related areas, including mathematical logic, geometry, history of mathematics, statistics, mathematical physics, and numerical analysis. Teaching benefits by cooperation with the School of Natural Sciences and other University Schools. The Department organizes regular research seminars hosting distinguished scholars from all over the world.

— www.dipmatematica.unito.it

Department of Physics

Teaching ranges from physics, optics and optometry to extra-departmental programs in medical physics and astrophysics; research covers a broad range of areas in fundamental and applied physics, including environmental and nuclear physics. The local branch of the National Institute of Nuclear Physics (INFN) is located in the Department.

— www.df.unito.it

Main Research Areas

- Logic, history of mathematics, teaching of mathematics
- Algebra and geometry
- Mathematical analysis and probability
- Mathematical physics
- Numerical analysis

Main Research Areas

- Nuclear and particle physics
- Astrophysics and astroparticles
- Medical physics
- Theoretical physics
- Environmental physics and hydrodynamics
- Applied physics
PhD programs at UniTo

The Doctoral School of UniTo offers a wide range of PhD programs encompassing the following scientific domains:

- **Natural Sciences**
- **Socio-Economic Sciences**
- **Life and Health Sciences**
- **Humanities**

- **Excellent training** through research
- **Public private partnerships**
- **International opportunities**
- **High quality supervision**
- **Active research environment, infrastructures and open access labs**
- **Soft skills training program**
- **Interdisciplinary research options**
- **Career development**
- **International and national networking**

The city of Torino and the Piemonte Region
Torino, international city of innovation

A strategic location

Torino is situated on the Po River in Italy’s north-western Piemonte Region, close to the Alps, and to beautiful countryside, rivers and lakes. Torino has an efficient transport system, 3 main train stations, and an international airport: Rome, Madrid, Frankfurt, Moscow, Paris and other key world destinations are easy to reach.

An international people-friendly city

Torino has more than 40 consulates representing EU and extra-EU countries and a distinctly international and intercultural flavour. Torino is linked with 44 cities worldwide through twin-city and other agreements, and hosts many international events every year. Visitors and newcomers will find it easy to meet others and enjoy the city’s dynamic social and cultural life.

A base for international agencies

Torino is the location chosen for the European Training Foundation (ETF), the EU agency that assists developing countries in the fields of education, training and labour market systems. In addition, Torino is a strategic centre for the United Nations: its international campus in the city is home to the United Nations Interregional Crime and Justice Research Institute (UNICRI), the International Training Centre of the ILO (ITC-ILO), and the United Nations System Staff College (UNSSC).

A centre for manufacturing and service industry

Torino is a business and manufacturing centre of importance in Italy and in Europe. Capital of the Italian automotive and car design industry, the city is also a centre of excellence for the aerospace industry. In addition, it is home to well-known publishing and print media houses, luxury brands, and food and wine producers. Torino was the first Italian city to develop a television and film industry, and parts of the old city centre are often used as sets for well-known TV serials and movies. Leading banks and insurance companies are based in Torino.

An “open laboratory” for the urban innovation

The City of Torino is committed to a strategic redesign of its policies in support of local development, aimed at strengthening the penetration of new technologies and to create social impact, to bring new opportunities to its citizens and businesses. Recently, the City signed a “Memorandum of Understanding - Torino Social Impact: City Lab for Change” with some local partners and is open to collaboration with others in order to create an open and collaborative platform of public and private subjects engaged in supporting entrepreneurship with social impact. In this context, the local Administration intends to promote models and forms of economic development capable of responding in an innovative way to the current main challenges, as well as contributing to improving the competitiveness and attractiveness of the Torino economic system, generating more and better jobs. In particular, the City intends to create an open ecosystem favourable to the birth and growth of frontier innovation and sharing. The characteristics of the evolutionary model of “Torino City Lab” are based on 3 main elements:

- Transparency, understood as the sharing of tangible and intangible assets (technology, laboratories, information on the city and its citizens, models and practices of social innovation)
- Openness and creation of an innovation ecosystem
- Agility in carrying out activities thanks to administrative, operational and simplification tools.
**Piemonte, a region to discover**

**Museums, Modern Art and UNESCO Royal Residences**

Torino has a Baroque city centre, several museums, including the Egyptian Museum, the National Museum of Cinema and the National Automobile Museum, great theatres, and a number of royal residences listed among the UNESCO World Heritage Sites. Modern art lovers can enjoy the GAM Modern Art Gallery, the Rivoli Castle Museum of Contemporary Art, the Merz Foundation and the Sandretto Re Rebaudengo Foundation, each with important artworks from Torino’s Arte Povera movement.

**Food and cuisine**

Torino’s history and the region’s prosperity have contributed to the creation of the city’s reputation as a centre of excellence for high-quality cuisine and excellence in food products. Torino and the Piemonte Region are renowned for traditional antipasti, agnolotti (a special local type of ravioli), quality local meats, superb cheeses, and excellent ice cream and patisserie. Torino is also a centre for the food industry, and exports chocolate, wine, cheese and coffee worldwide.
Nature and UNESCO sites

Torino’s parks and two rivers together with the nearby mountains and lakes provide a great leisure environment. Piemonte has Langhe-Roero and Monferrato included on the list of UNESCO World Heritage Sites: the Langhe-Roero and Monferrato Vineyard Landscape of Piemonte, south of Torino, consists of five distinct winegrowing areas. Langhe-Roero and Monferrato is one of Italy’s most important wine-producing areas, and is also a “cultural landscape”, the result of the combined work of both nature and humankind. It lies within easy reach of Torino by car and by train.

Events

Torino hosts a wide range of national and international events. To name just a few: Artissima and Paratissima, both international contemporary art fairs; the Salone Internazionale del Libro di Torino; the Salone del Gusto and Terra Madre international fair of Italian and world food products; the Torino Jazz Festival; and the Torino Film Festival.
